

Android Projects

I. ANDROID based CLOUD COMPUTING

1. Privacy-Preserving Optimal Meeting Location Determination on Mobile Devices (**IEEE 2014**).
2. Cloud based java compiler-CBJC (**IEEE 2014**).
3. StreamMe: Me-centric multimedia streaming system with clouds using smartphone (**IEEE 2014**).

II. ANDROID based SURVEILLANCE

1. GPS based human motion monitoring system using android smartphone (**IEEE 2014**).
2. Android interface based GCM home security system (**IEEE 2014**).
3. Anti-theft application for android constructs devices.

III. ANDROID based DATA MINING

1. A Location-Privacy Threat Stemming from the Use of Shared Public IP Addresses (**IEEE 2014**).
2. QR-code Based Information Access System in shopping mall (**IEEE 2014**).

IV. ANDROID based WEB MINING

1. A Personal Mobile Commerce Pattern Mining and Prediction using Android smartphone (**IEEE 2014**).
2. Join with you-Social Networking on android smartphone (**IEEE 2014**).

3. Online Shopping Product manners in the Markets using Android smartphone (**IEEE 2014**).

V. ANDROID based REAL TIME APPLICATION SYSTEMS

1. Quick-witted CAR PARKING guidance and destruction alert (**IEEE 2014**).
2. The Application of considerate screen using android smartphone (**IEEE 2014**).

VI. ANDROID based WEB SERVICES

1. Toward Preserving Privacy and Functionality in Geosocial Networks (**IEEE 2014**).
2. Using Android smartphone find the companion location (**IEEE 2014**).

VII. ANDROID based EMBEDDED SYSTEM

1. Smart android home automation system (**IEEE 2014**).
2. ABASH — Android based smart home monitoring using wireless sensors (**IEEE 2014**).
3. Systolic blood pressure estimation using Android smart phones (**IEEE 2014**).
4. Enhancing User Privacy on Android Mobile Devices via Permissions Removal (**IEEE 2014**).
5. An Approach for Object Detection in Android Device (**IEEE 2014**).
